Doug Lebda is the Founder, Chairman and CEO of LendingTree.

An expert on the consumer finance industry and mortgage markets, Doug provides insight and analysis on the current and future state of consumer lending and how FinTech companies, such as LendingTree, are using cutting edge technology to change financial services. Doug has been a frequent contributor and guest speaker on major news networks such as Bloomberg, CNBC, Fox Business and The Street. He has been

featured on live televised programs such Mornings with Maria, CNBC Squawk Box and Mad Money with Jim Cramer.

“There has to be a better way.”
– the seed that became LendingTree

A passionate entrepreneur, Doug left business school (which he would return to nearly 20 years later) to start LendingTree during the dot-com era after experiencing his own frustrations with trying to obtain a mortgage. Doug believed that the lack of transparency and confusing process of obtaining a mortgage at the time needed to change. He gave himself one year to find success.

Twenty years later, LendingTree has since become a leader in empowering consumers and changing how people shop for financing. Today, Doug still has a continued passion for entrepreneurship, investing in various business opportunities and start-ups. In addition to his expertise in consumer finance, Doug actively provides expert advice, insight and interviews on entrepreneurship and business development. Today, Doug co-teaches an entrepreneurship class at the University of Virginia Darden School of Business, his alma mater.
